# Courses

**Are you looking for a safety training course which matches your specific operational situation perfectly? Choose AquaSafety's custom solutions. After all, every organisation is different, and every situation requires a different approach. We get the best out of your organisation by ensuring that our training and education is an exact match for your operational situation.**

AquaSafety trains and educates employees in an understandable and professional manner. Because your safety is our passion!

## Custom solutions

Using your input, we tailor our courses to suit your operating conditions, enabling us to get the best out of your employees.

## Based on your requirements, we

- Modify the course material according to your specific operating conditions and the desired level
- Establish an annual program pertaining to the agreed themes

- Evaluate the training program annually, adapting and adjusting it where necessary

That is why you should choose the quality of our approved safety training courses.

## Our courses

AquaSafety offers the following safety training courses:

- ERO (Emergency Response Officer)
- Team leader (Emergency Response)
- Respiratory protection (Emergency Response)
- Evacuation drills (Emergency Response)
- Practising with small fire extinguishers
- First Aid courses
- Using an AED
- SCC cursussen
- Safety training (custom)
- Safe use of telescopic handlers

- Safe use of aerial work platforms
- Safe use of forklifts

## Emergency Response

If you have one or more employees, you are required to appoint EROs at your company. Firefighting, evacuation, resuscitation, AED operation, bandaging: the Emergency Response team must undergo regular training to develop and maintain proficiency in all safety areas. Choose AquaSafety's approved ERO training.

Our instructors will provide your Emergency Response team with an ERO training course tailored to your specific operational situation. Because your safety is our passion.

## Contents of the ERO training course

Our ERO training course covers the following aspects:

- Increasing and maintaining the knowledge and skills required to respond effectively to emergencies
- Obtaining insight on the safety within your company.
- Identifying dangerous situations
- Gaining knowledge on acting safely and performing life-saving actions
