Fall protection

Choosing the right fall protection is of vital importance. Keep your fall protection in top shape through proper maintenance. AquaSafety supplies, inspects, and maintains all fall protection related equipment. Your safety is our passion!

Do you want to learn exactly how to use your new fall protection? Choose one of our safety training courses. Prevent accidents caused by improper use. AquaSafety is specialised in safety training.

Advice

It is important to make the right choices when purchasing fall protection. AquaSafety can advise you on purchasing the right fall protection. Our professionals are fully familiar with the materials as well as the laws, standards, and regulations. We can ensure that you buy the right fall protection for every situation.

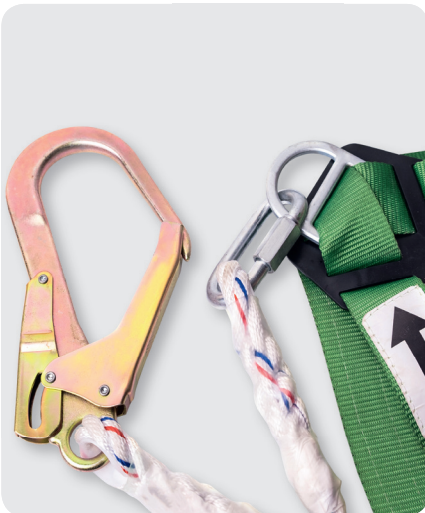

Why AquaSafety?

- Over ten years of experience
- Officially approved fall protection equipment inspection station
- We work objectively and independently
- In addition to supply and maintenance of equipment, we train the users of fall protection equipment

Working safely at height

Harnesses, lanyards, and anchorage: AquaSafety supplies all imaginable products and services pertaining to working at height. Good fall protection begins with professional equipment: products bearing a quality mark, and which are regularly inspected and approved by AquaSafety's inspectors.

Legal requirement

If you work on rooftops, aerial work platforms, platforms, scaffolding, silos, tankers, or in trees, you are legally required to use approved and certified fall protection when working above 2.5 metres. Let our specialists inform you, without obligation. They know exactly which products are most suitable for you.

Fall protection inspection

The quality of fall protection can make the difference between life and death. That is why you should leave the inspection of your equipment up to AquaSafety's experts. We are an SCC-approved company with years of experience. We inspect your equipment according to the applicable standards, including the following points:

- Wear and tear
- Discolouration
- Integrity of seams
- Integrity of stitches
- Damage
- Corrosion

The inspection of your fall protection equipment is in good hands with AquaSafety. Because your safety is our passion!

Education & training

AquaSafety is specialised in providing safety training. We also offer fall protection training. Because no matter how reliable and sturdy your equipment is, safety depends entirely on using it correctly. Follow the Working Safely at Height training course and prevent unnecessary accidents. Our experienced instructors will provide extensive training on the use and maintenance of your fall protection, resulting in security and peace of mind!
